

BHSS Practicum Supervision Plan Example

This plan serves as verification of the supervision provided by

_____ (Supervisor) to practicum student

_____ (Supervisee). The supervision plan covers the following

period _____ (start date) through _____ (end date).

Additional supervision or mentorship will be provided by

_____. The person or persons identified above may be contacted in the primary supervisor's absence.

Purpose:

The purpose of practicum supervision is to guide the professional development of the BHSS practicum student and assess the development of clinical skills over a period of at least five months.

Goals for the supervised experience:

- Promote the growth and development of the supervisee
- Protect the welfare of the client or patient
- Monitor supervisee performance and skill development
- Empower supervisee to act ethically in clinical relationships

Expectations for BHSS practicum:

At minimum, BHSS practicum supervisee will do the following either independently or with a co-provider:

- Advocate for health equity through language and communication with clients/patients and care teams
- Practice client/patient engagement skills through active listening and a trauma informed lens
- Deliver culturally responsive services
- Collaborate with care teams through careful documentation of services
- Screen and assess client or patient needs utilizing best practices and agency or clinic processes
- Co-create whole health care or treatment plans with clients and patients
- Deliver brief, evidence-informed interventions aligned with patient or client whole health care plan or treatment plan
- Practice ethical principles in all interactions with client, patients, and care teams

At minimum the BHSS supervisor will:

- Meet with the supervisee a minimum of 12 times over the course of the practicum
- Schedule supervision sessions at least biweekly
- Provide timely feedback on strengths and areas for improvement during the practicum
- Verify the student completed a minimum of 240 hours of work with a minimum of 60 hours of direct client or patient contact on a form provided by DOH

Specific plan for development of clinical skills:

Examples:

- Observe clinical service provider engage a patient in clinical care for one month
- Assist a clinical service provider deliver clinical interventions in an individual or group setting for two months
- Independently deliver brief clinical interventions to an assigned patient (s) for three months
